Download Godot

Digital Technologies · School and personal computers

You will

- download Godot and unzip it
- keep it in Documents › Godot
- pin it to Start so it's easy to open

You need

- a Windows computer: a school computer or your own (Chromebooks can't run Godot)

Before you start

- Godot has no installer: you download it, unzip it, and run it.
- On a school computer, Godot stays with your login on that computer. Use the same computer each lesson, or follow this guide again on a new one.

 Click here  Look here

1

Chrome › godotengine.org/download/windows

Go to:

`godotengine.org/download/windows`

Click the top button, **Godot Engine**.

Use **Godot Engine**, the plain one. The second button, Godot Engine – .NET, is for a different language.

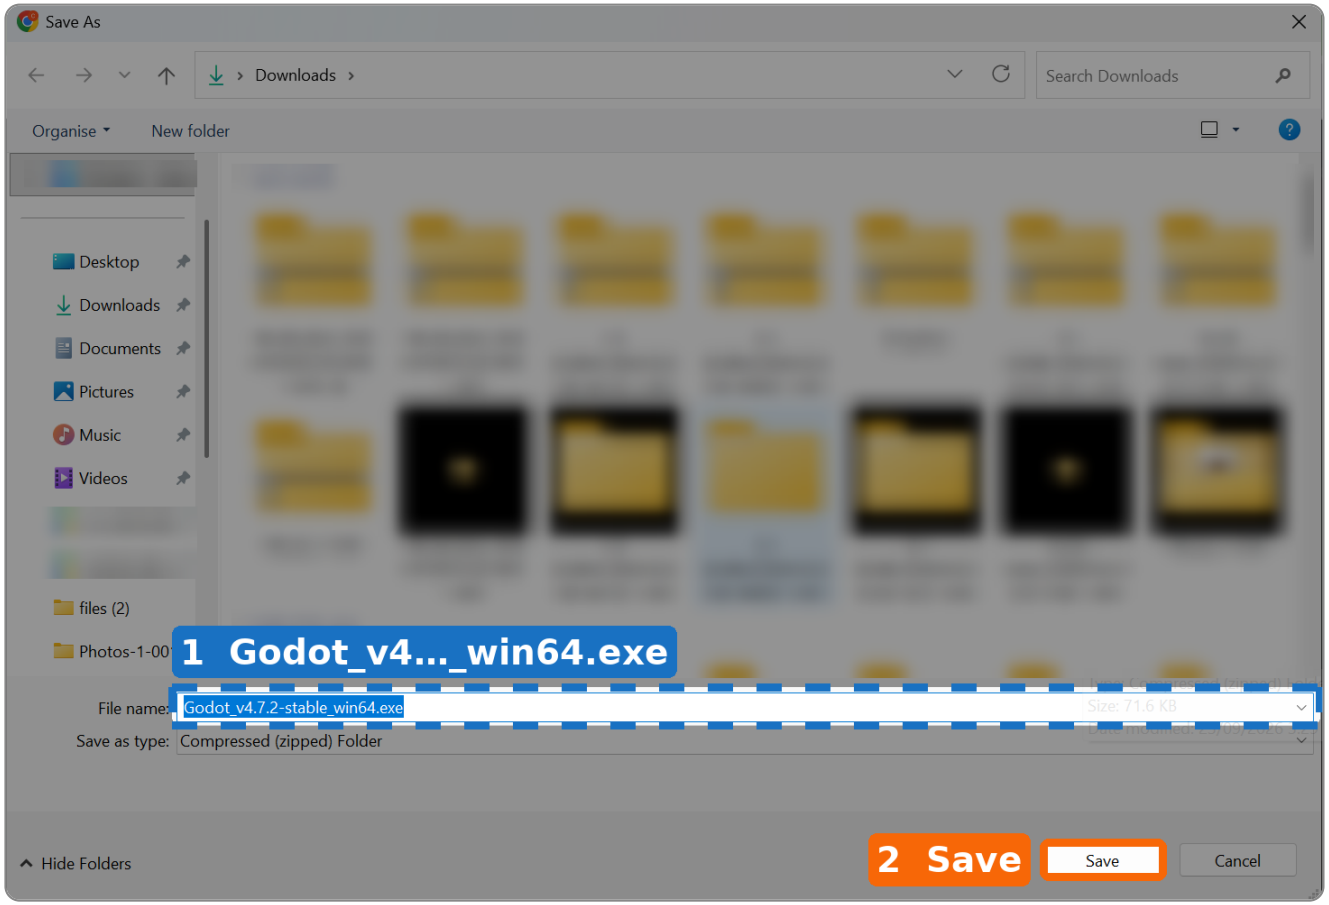

2

Chrome › Save As › only if it opens

Leave the name as it is.

Click **Save**.

Most computers skip this window and download straight away. Ignore the donation box on the page.

3

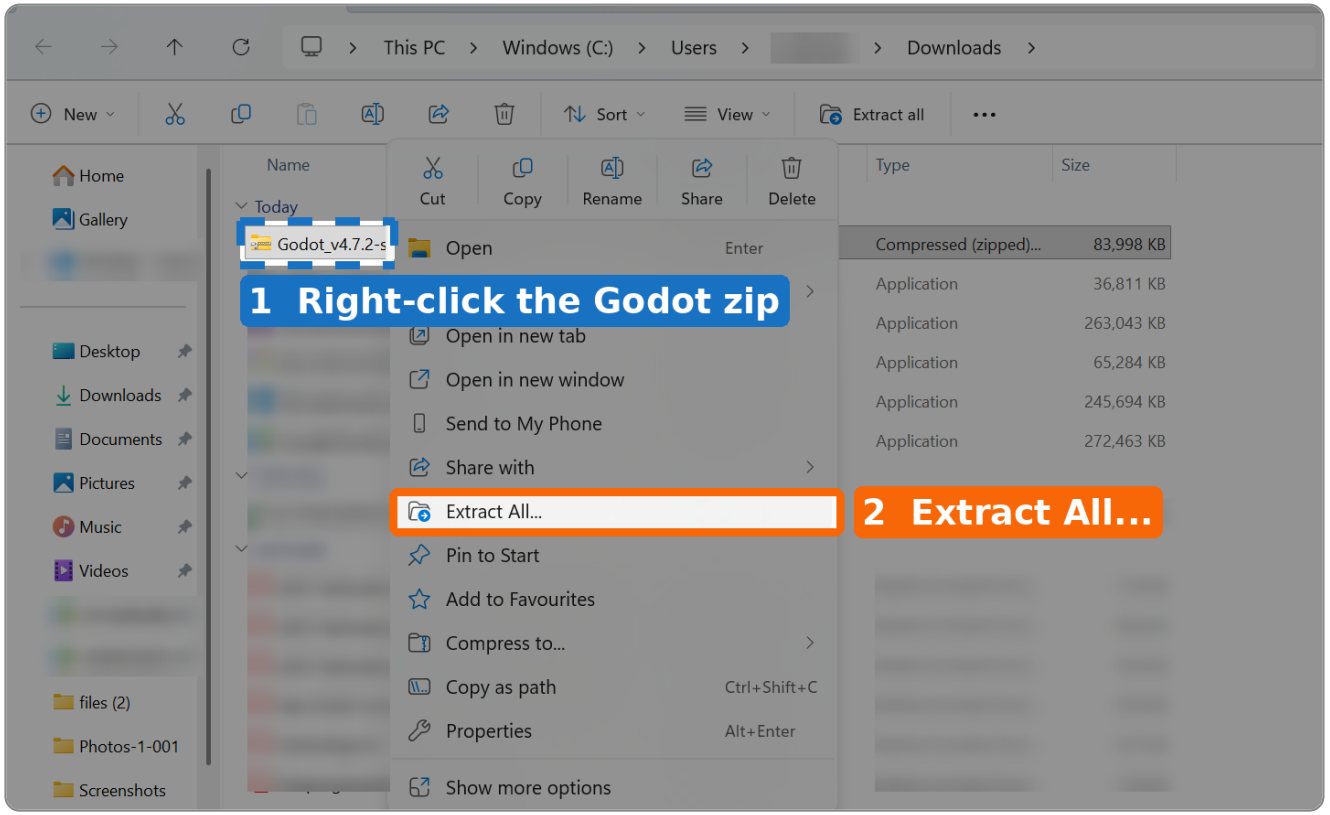

File Explorer › Downloads

Open File Explorer and click Downloads.

Right-click the Godot file (its type is Compressed (zipped) Folder).

Click **Extract All...**

The name ends in `.exe`, but it's a zip. It won't run until you extract it.

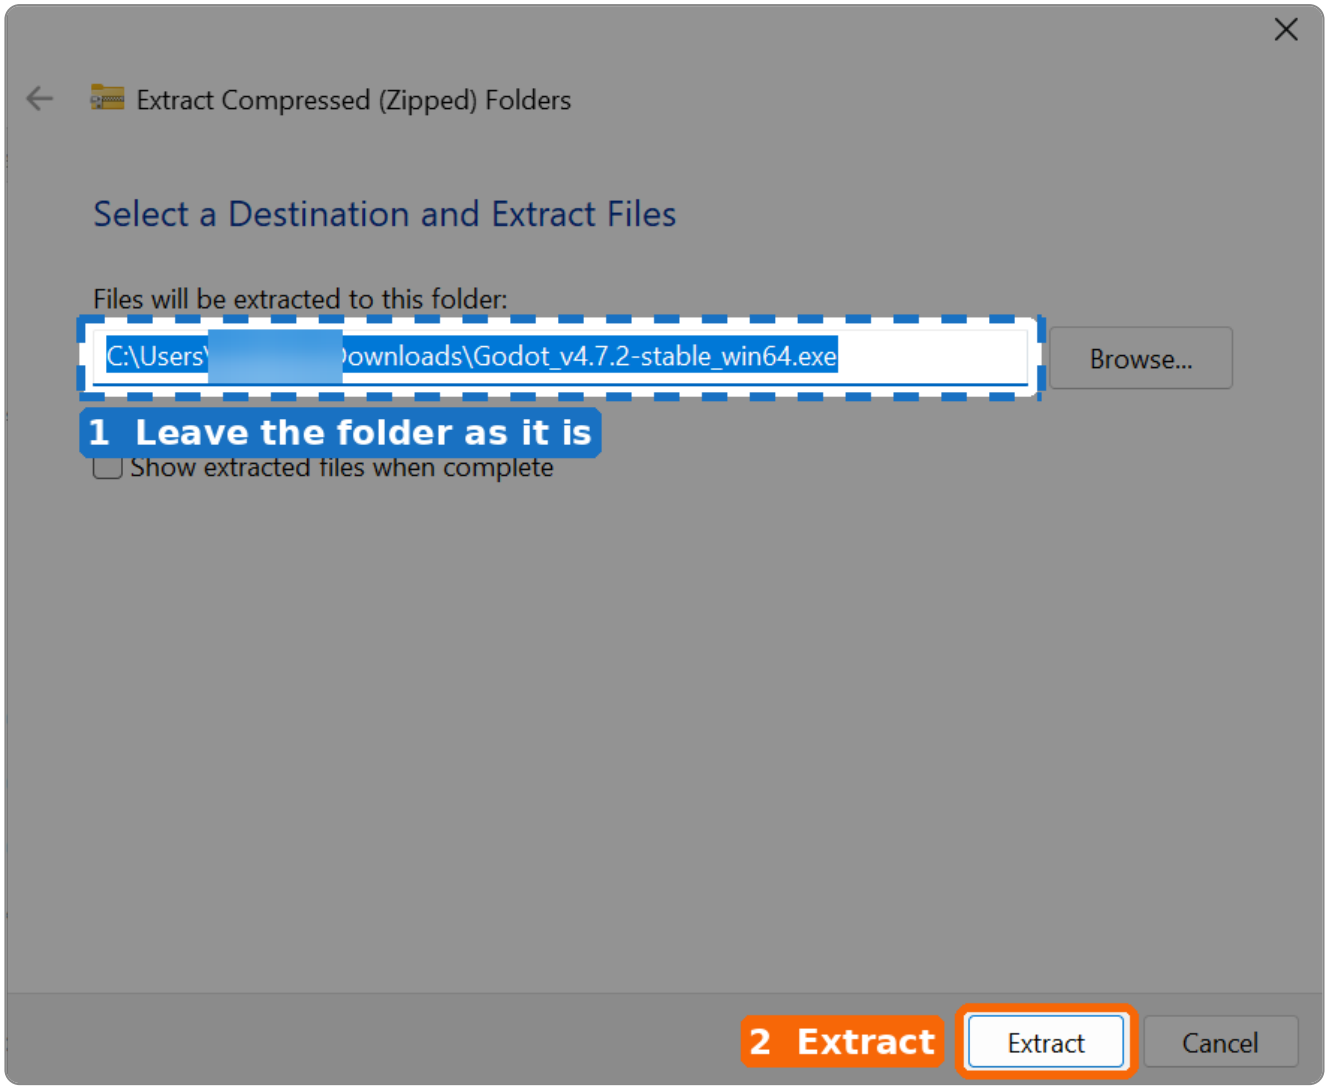

4

Extract Compressed (Zipped) Folders

Leave the folder as it is.

Click **Extract**.

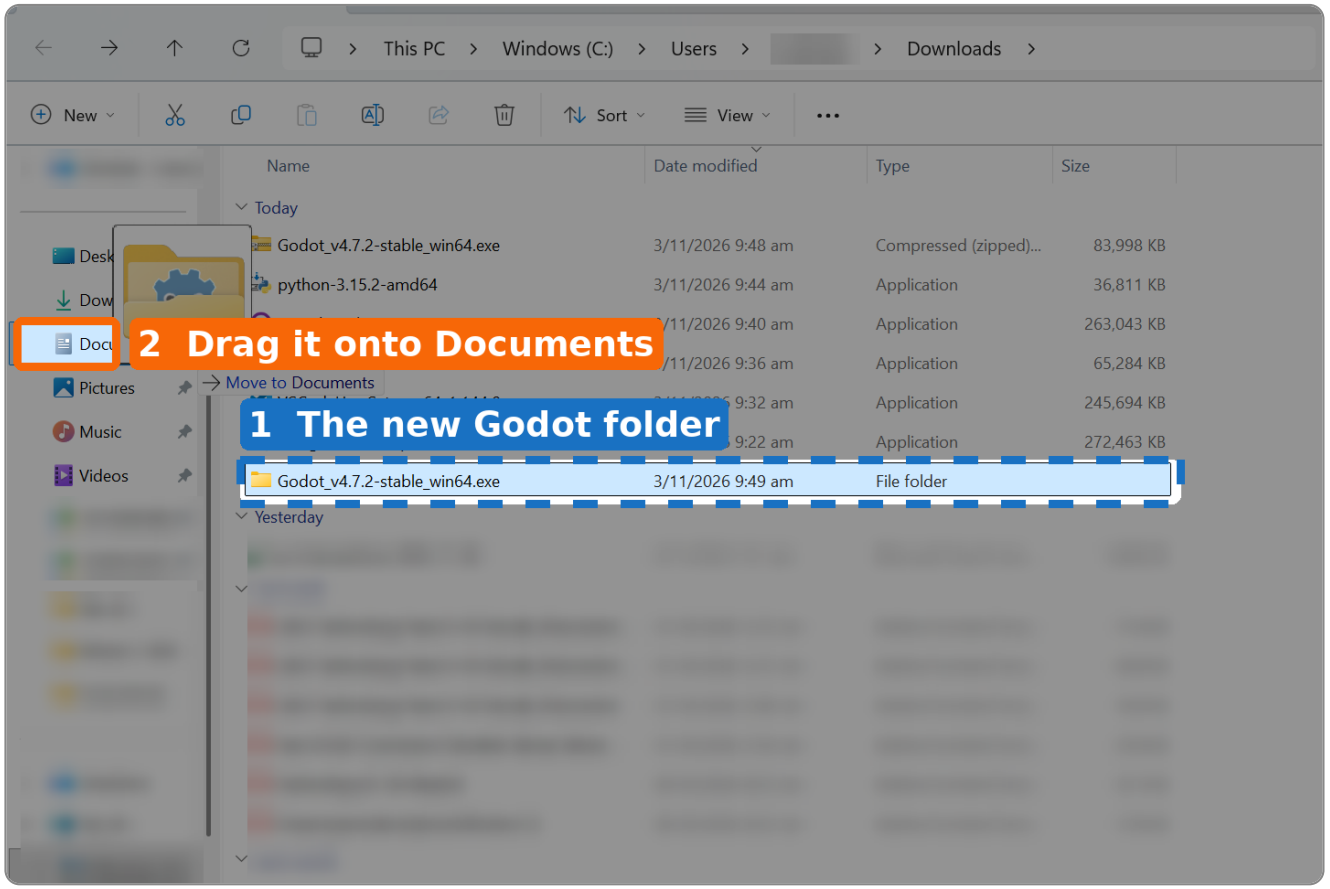

5

File Explorer › Downloads

Find the new Godot folder (type File folder).

Drag it onto **Documents** in the left pane.

Downloads isn't a safe place to keep apps.

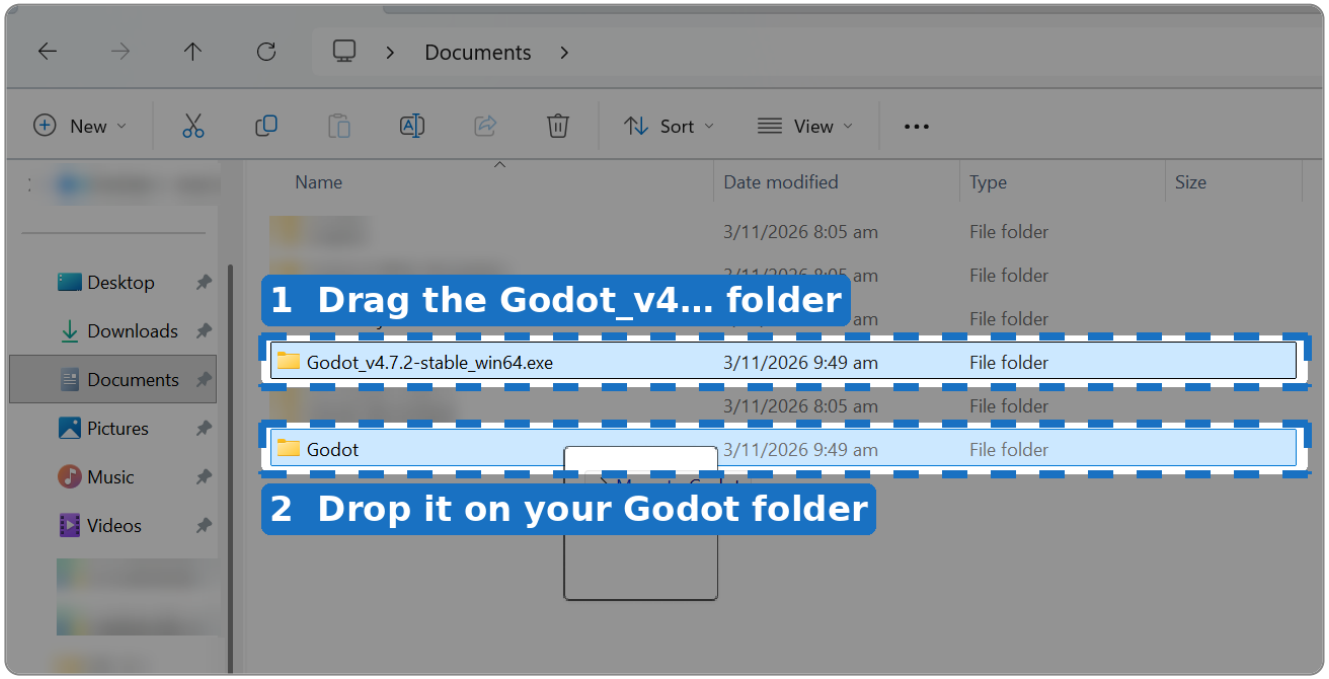

6

File Explorer › Documents

Click **New** › **Folder** and name it `Godot`.

Drag the Godot folder you moved onto your new Godot folder.

Keeping every Godot version in one folder makes it easy to find.

7

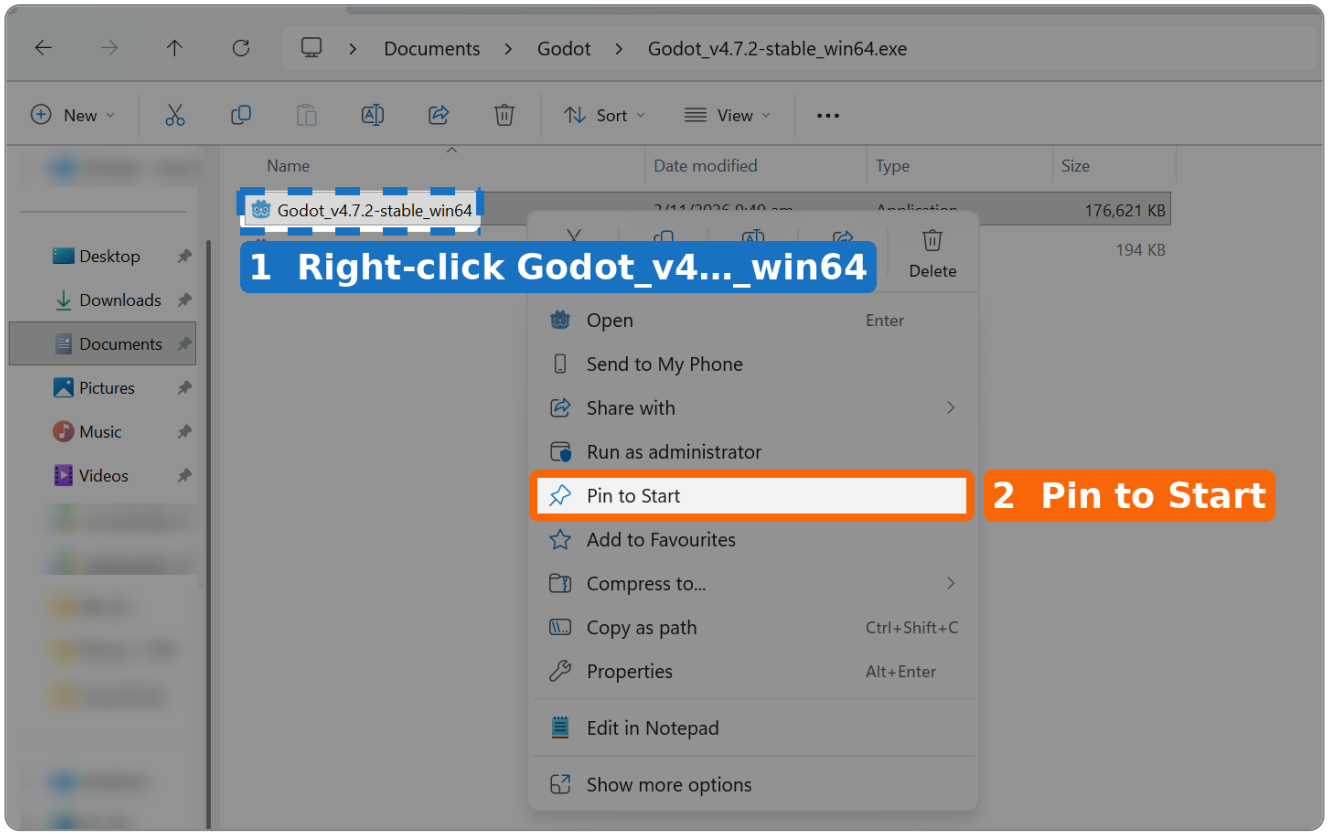

File Explorer › Documents › Godot

Double-click the folder to open it.

Right-click `Godot_v4…_win64` (the one without console).

Click **Pin to Start**.

No Pin to Start? Click **Show more options** first.

8

Windows › Start

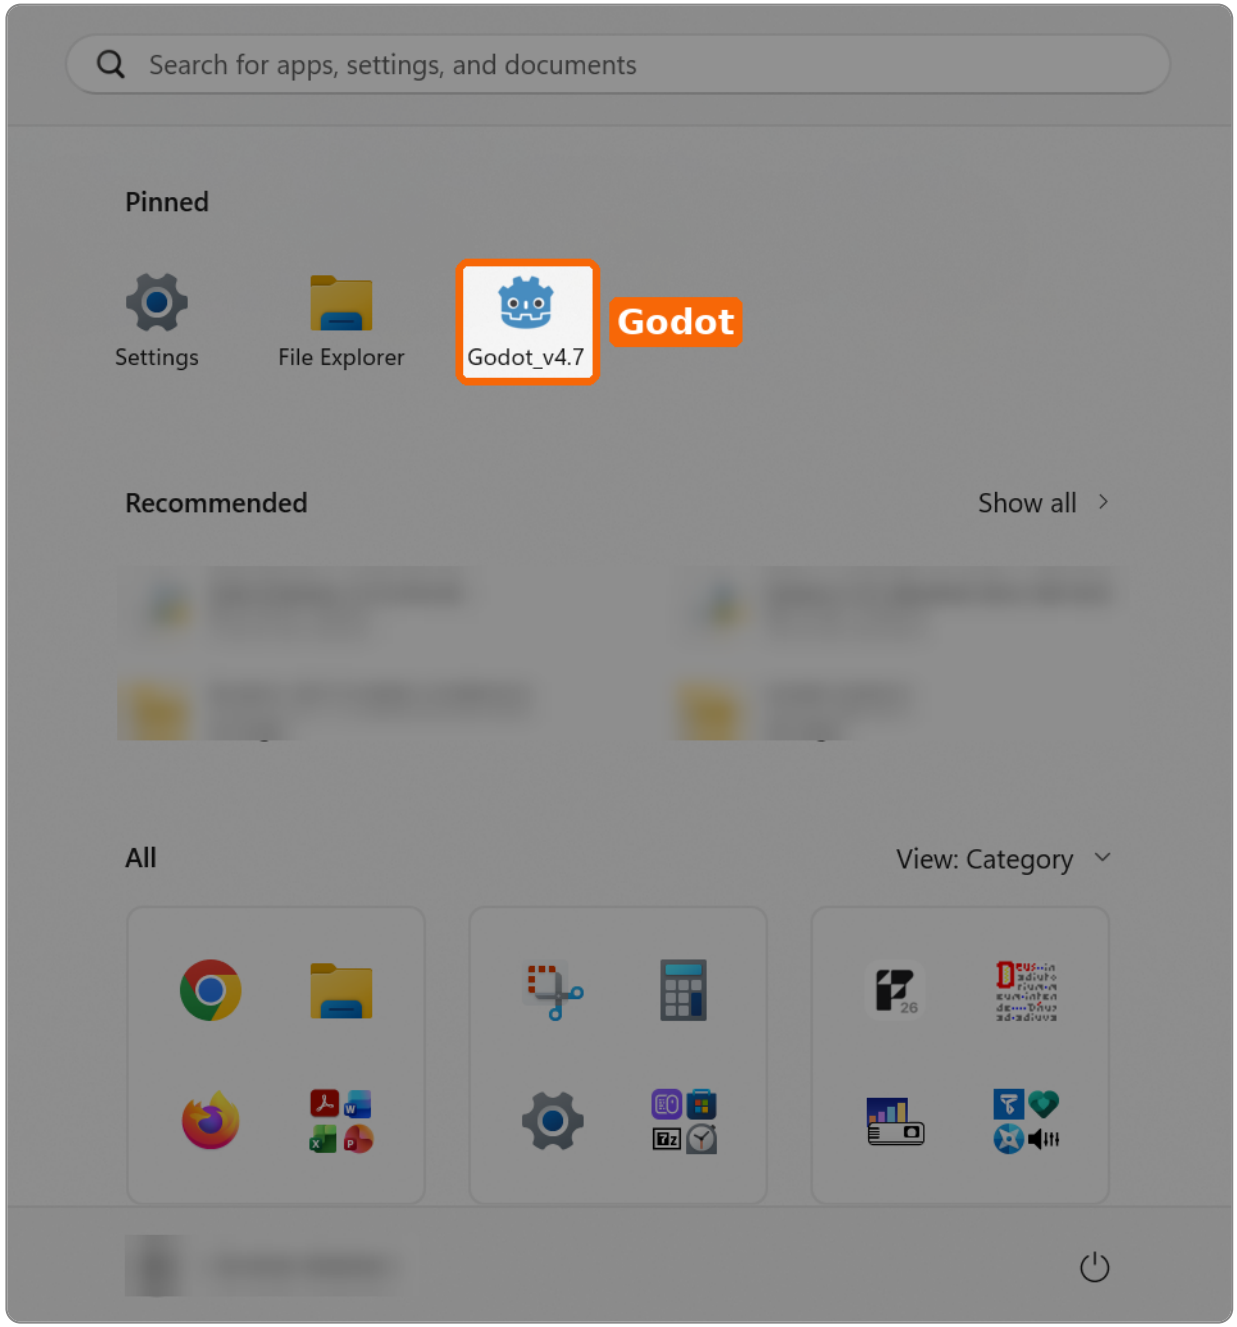

Click Start.

Click Godot under Pinned.

Godot opens on its Project Manager.

> **Check:** Godot is pinned to Start.

If something goes wrong
Windows protected your PC: click More info, then Run anyway.

Next
Make your first project (see the guide Make a Godot project).

On a school computer
Godot is saved for your login on this computer. On a different computer, follow this guide again. It takes about five minutes.

A new version
Download it the same way and put it in Documents › Godot too. Unpin the old one from Start and pin the new one.

Checkpoint

- [ ] I can download and unzip Godot.
- [ ] Godot is in Documents › Godot.
- [ ] Godot is pinned to Start and opens.
