Install VS Code extensions

Digital Technologies · School and personal computers

You will

- install **Live Server**, to preview web pages
- install **Draw.io Integration**, to draw diagrams and wireframes
- install **Python**, for Python coding

You need

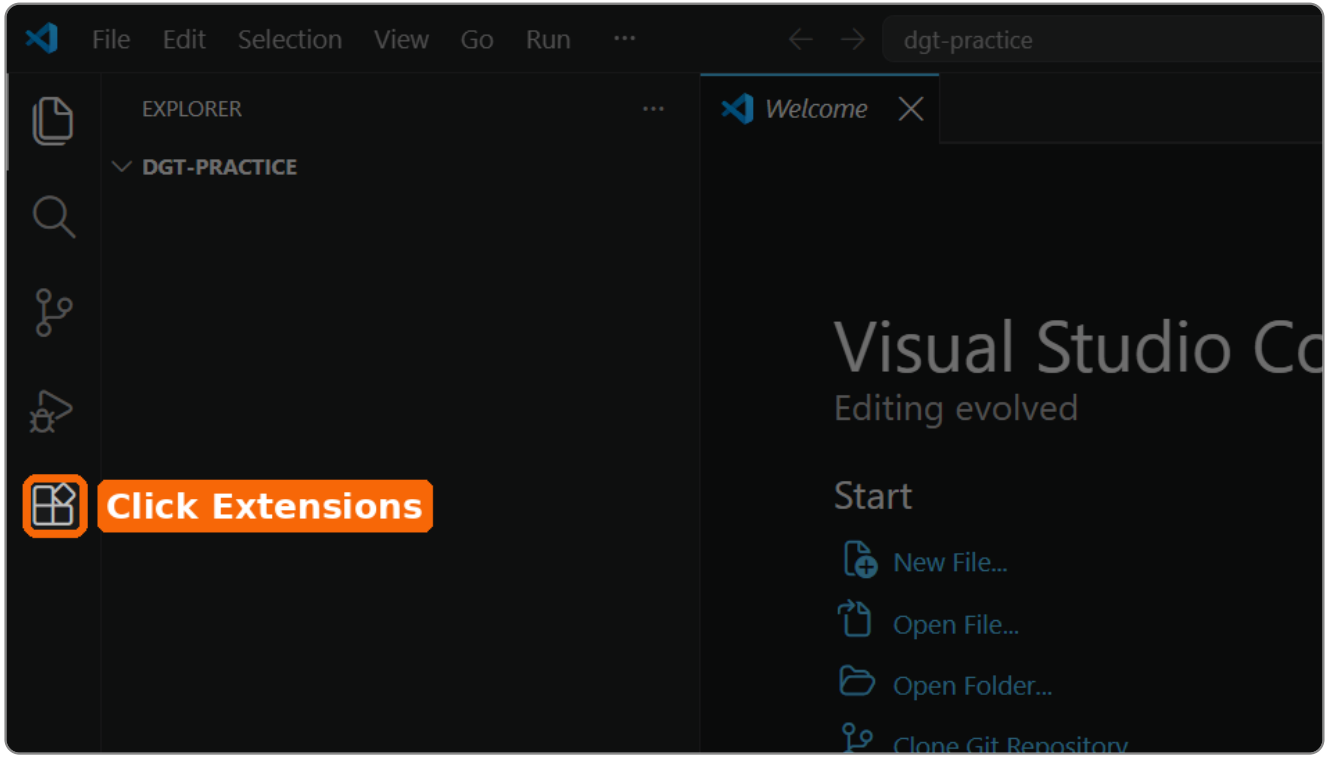

- VS Code with a project folder open (see the guide Open a project folder in VS Code)

 Click here  Look here

1

VS Code

Click the **Extensions** icon in the left bar.

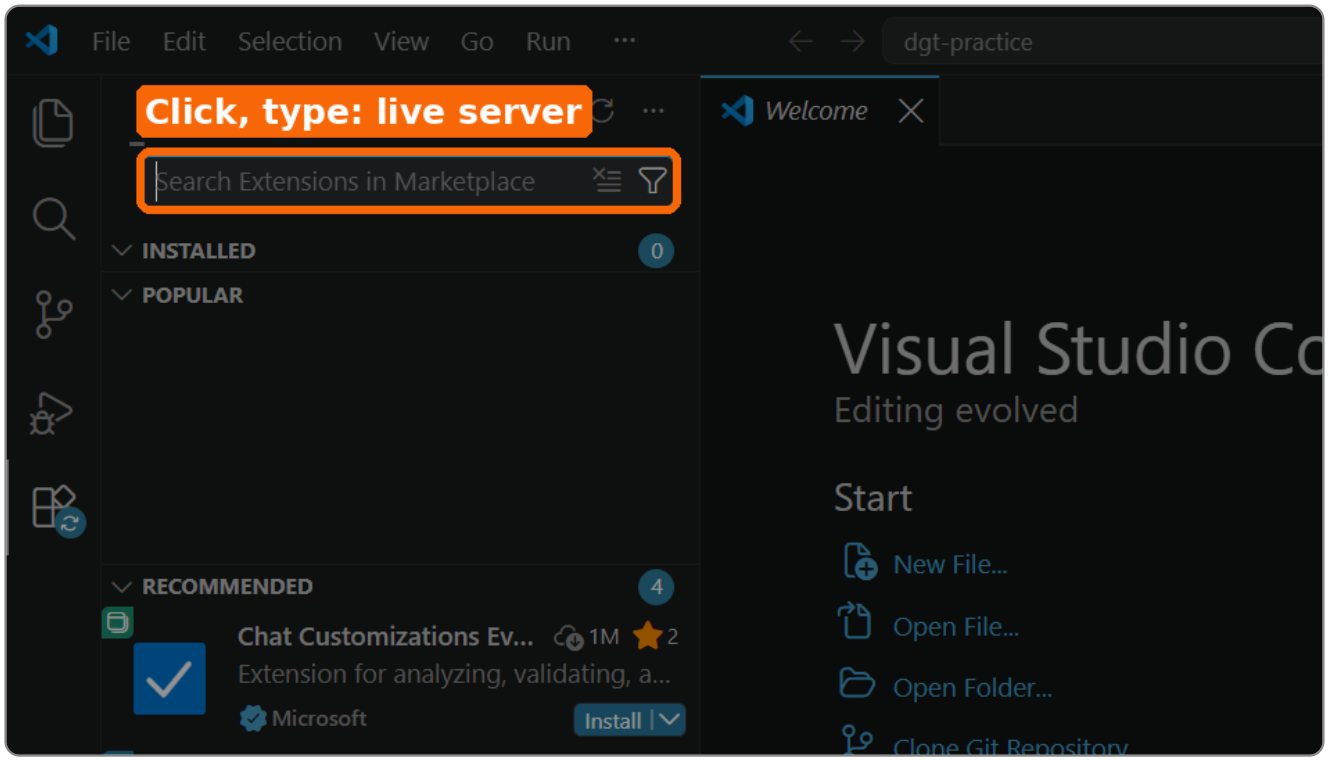

2

VS Code › Extensions

Click the search box.

Type `live server`.

3

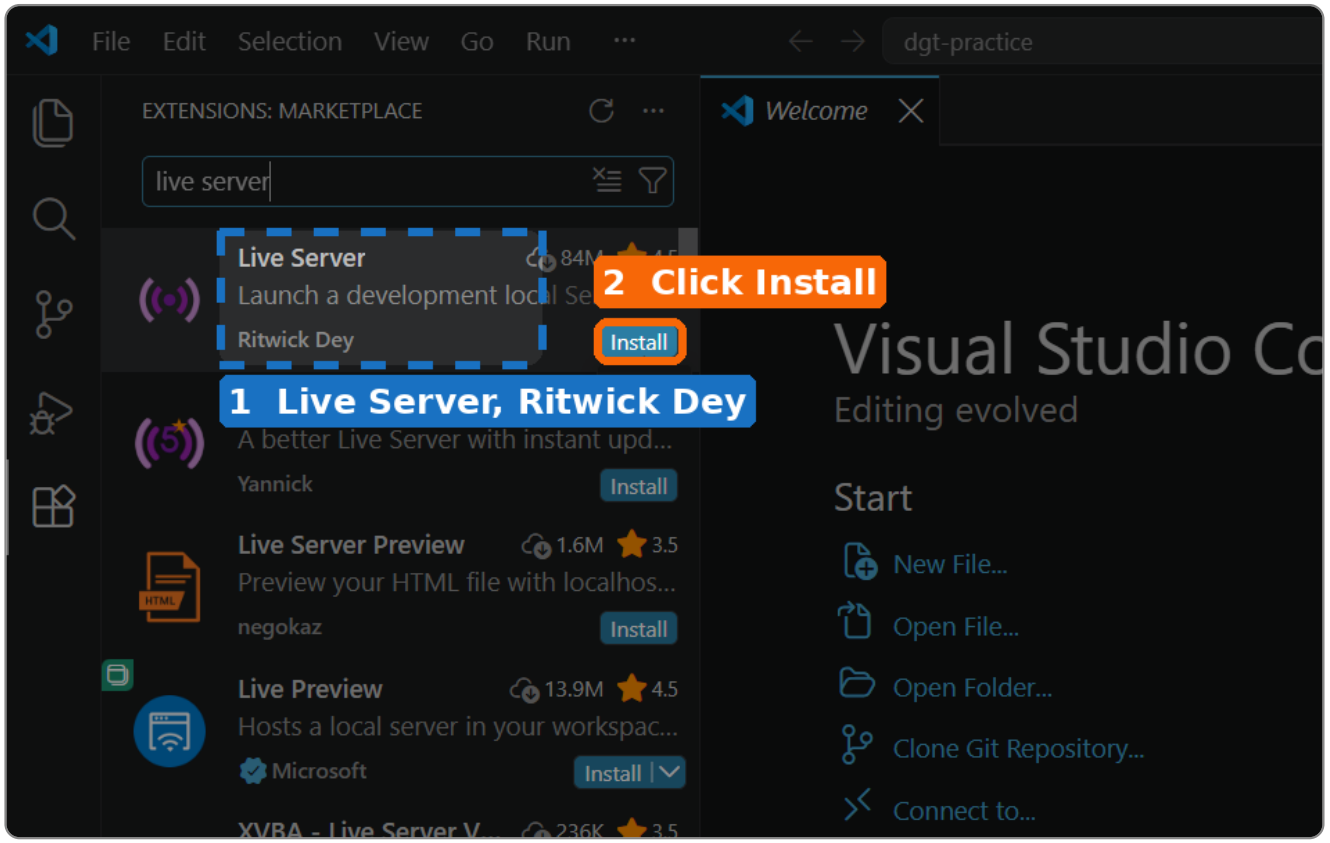

VS Code › Extensions

Find **Live Server** by **Ritwick Dey**.

Click **Install**.

Check the name and the author. Some look-alike extensions have similar names.

If something goes wrong
A window asks "Do you trust the publisher?": click **Trust Publisher & Install**.

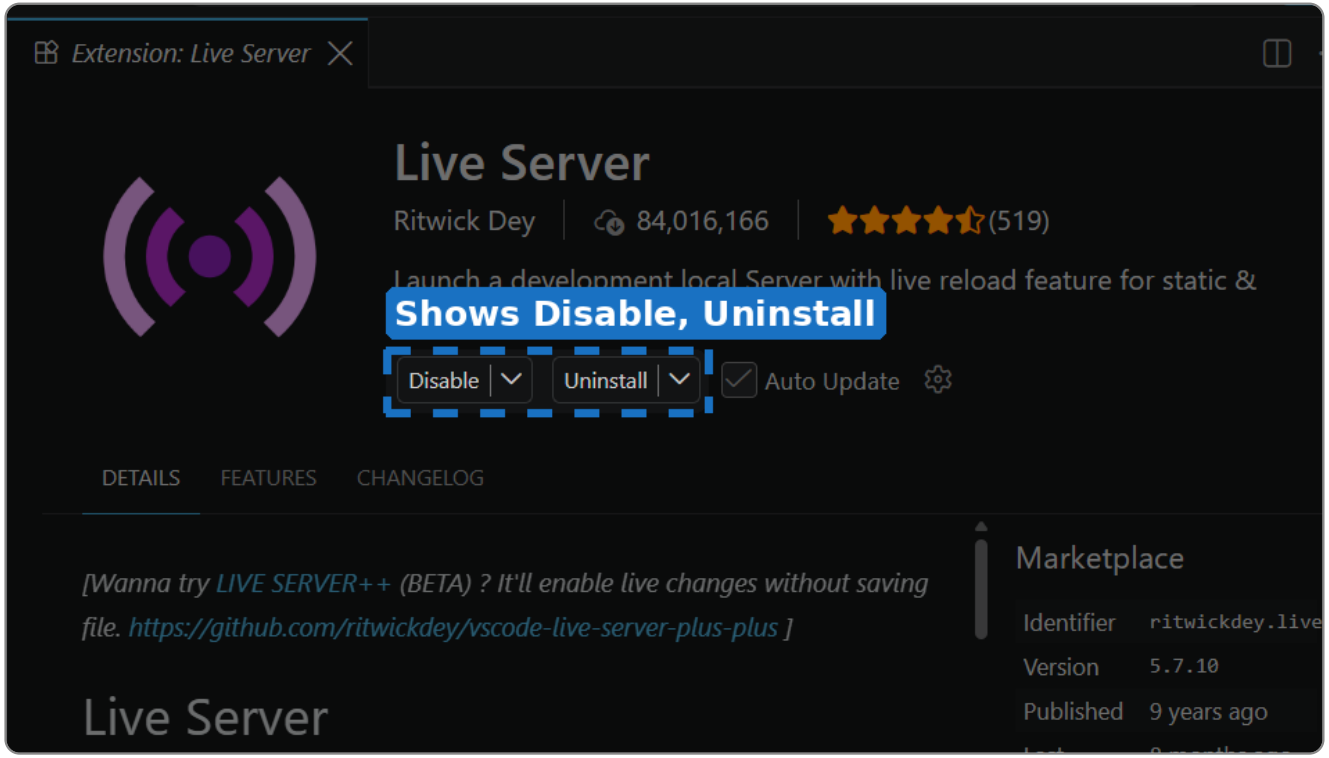

4

VS Code › Extension: Live Server

Wait while it installs.

> **Check: Install** changes to **Disable** and **Uninstall**.

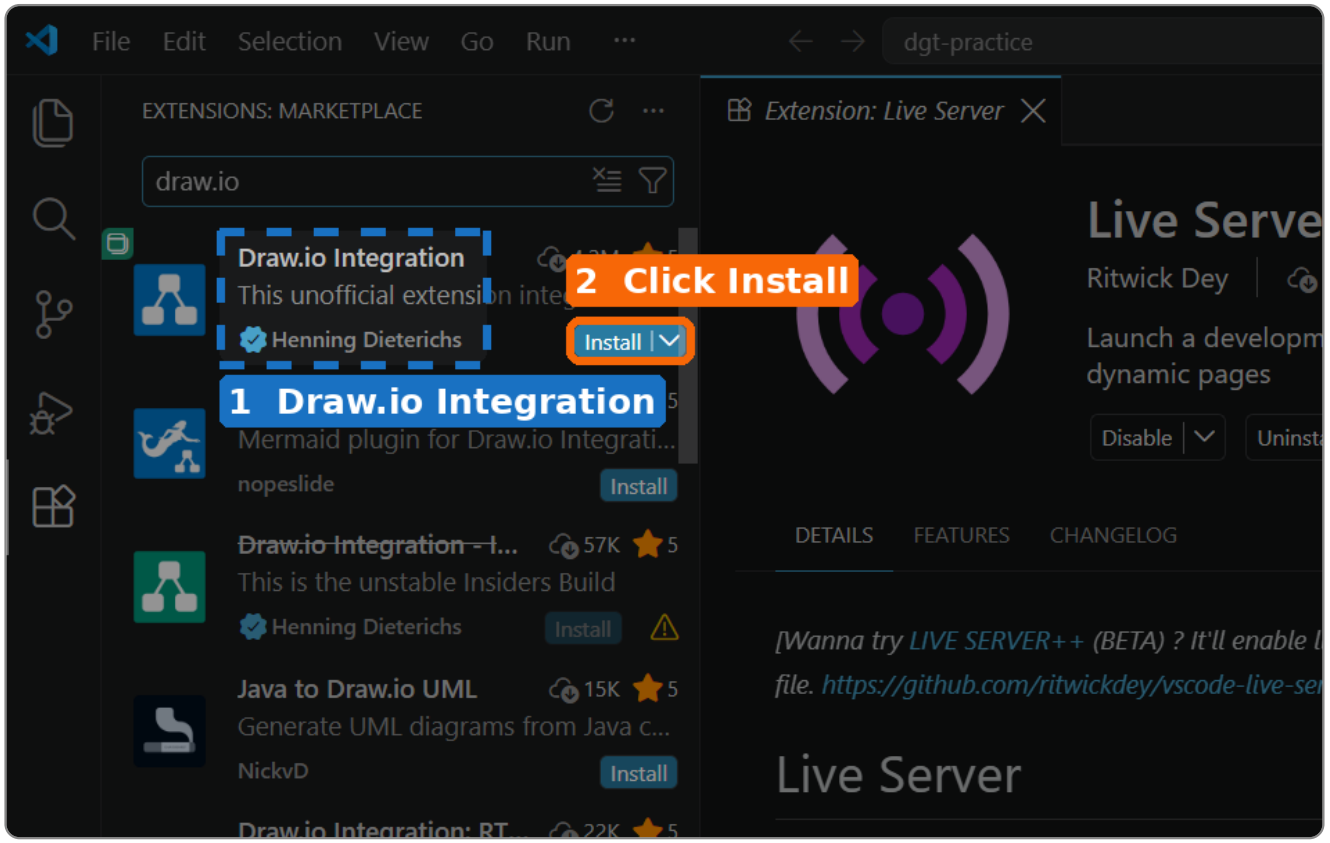

5

VS Code › Extensions

Select the text in the search box.

Type `draw.io`.

Click **Install** beside **Draw.io Integration** by **Henning Dieterichs**.

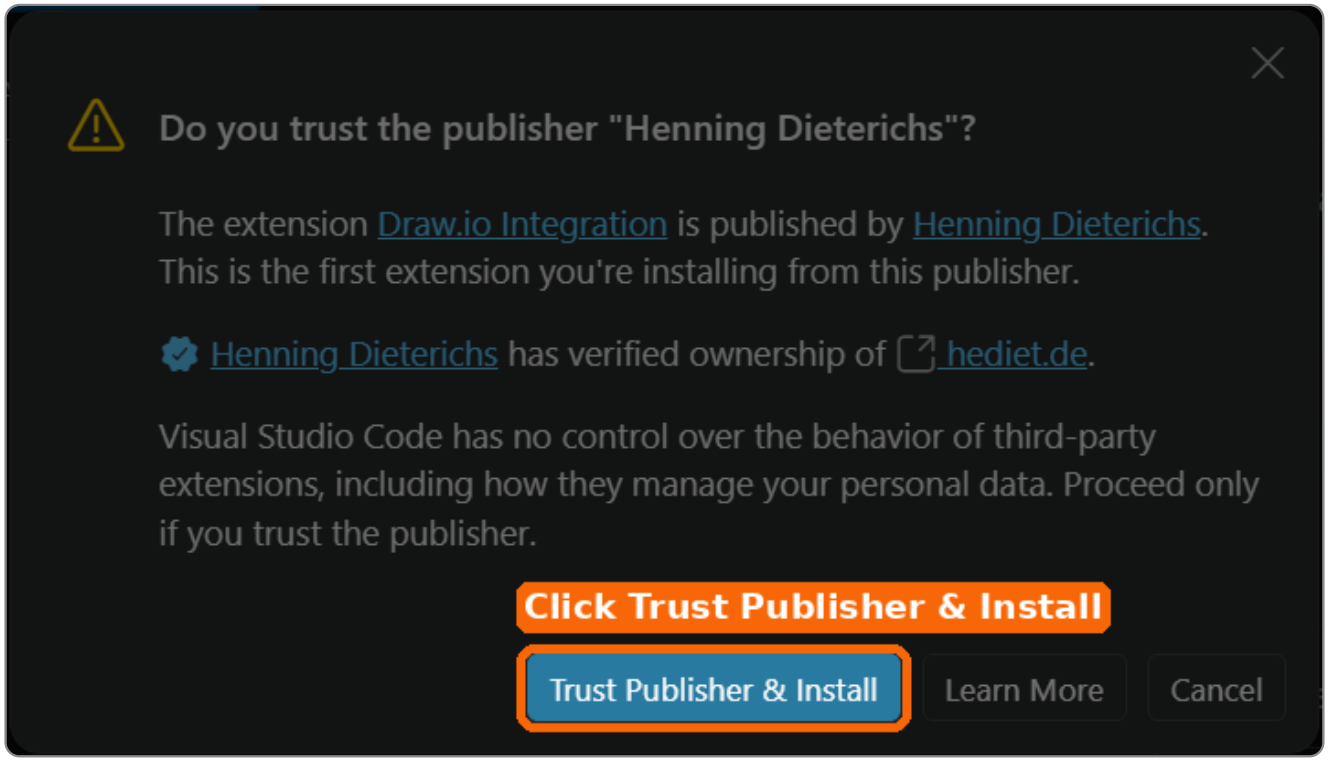

6

VS Code › Do you trust the publisher?

Click **Trust Publisher & Install**.

This window only appears the first time you install from a publisher.

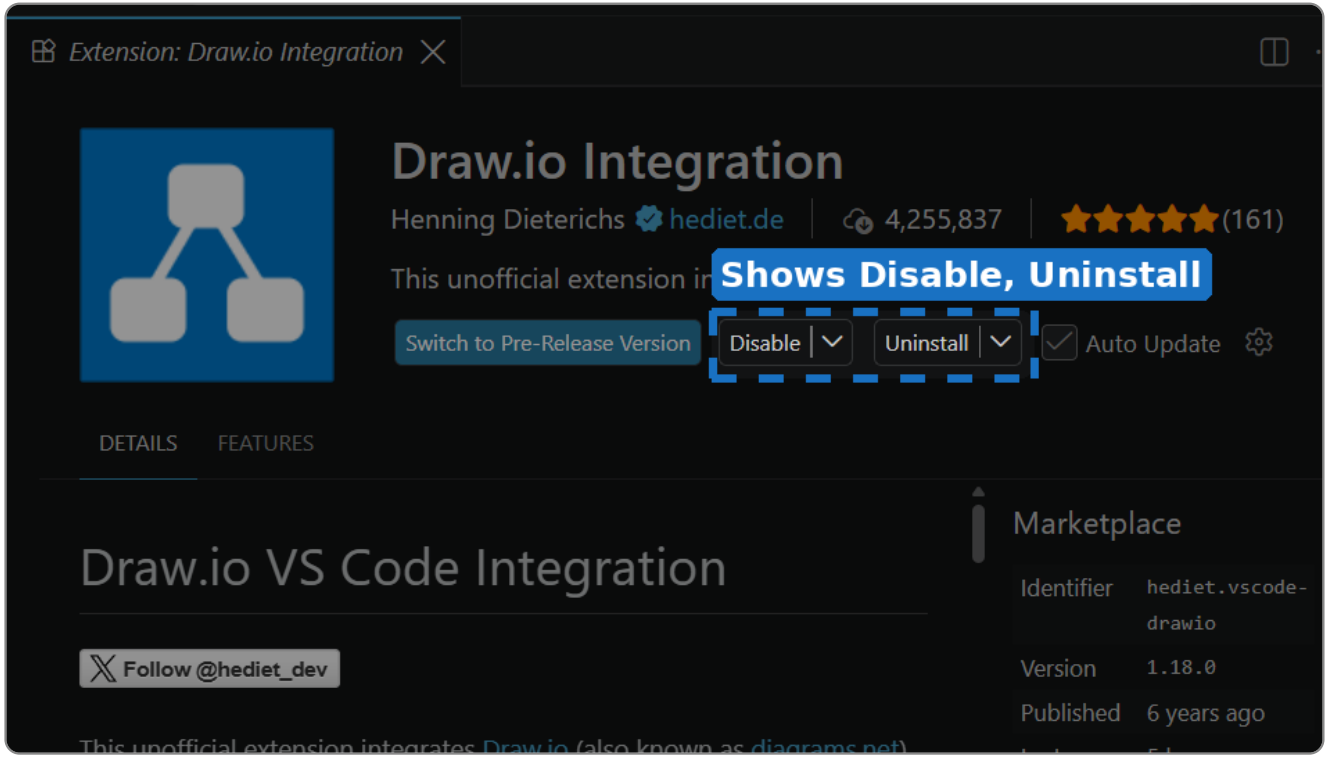

7

VS Code › Extension: Draw.io Integration

Wait while it installs.

> **Check: Disable** and **Uninstall** appear.

8

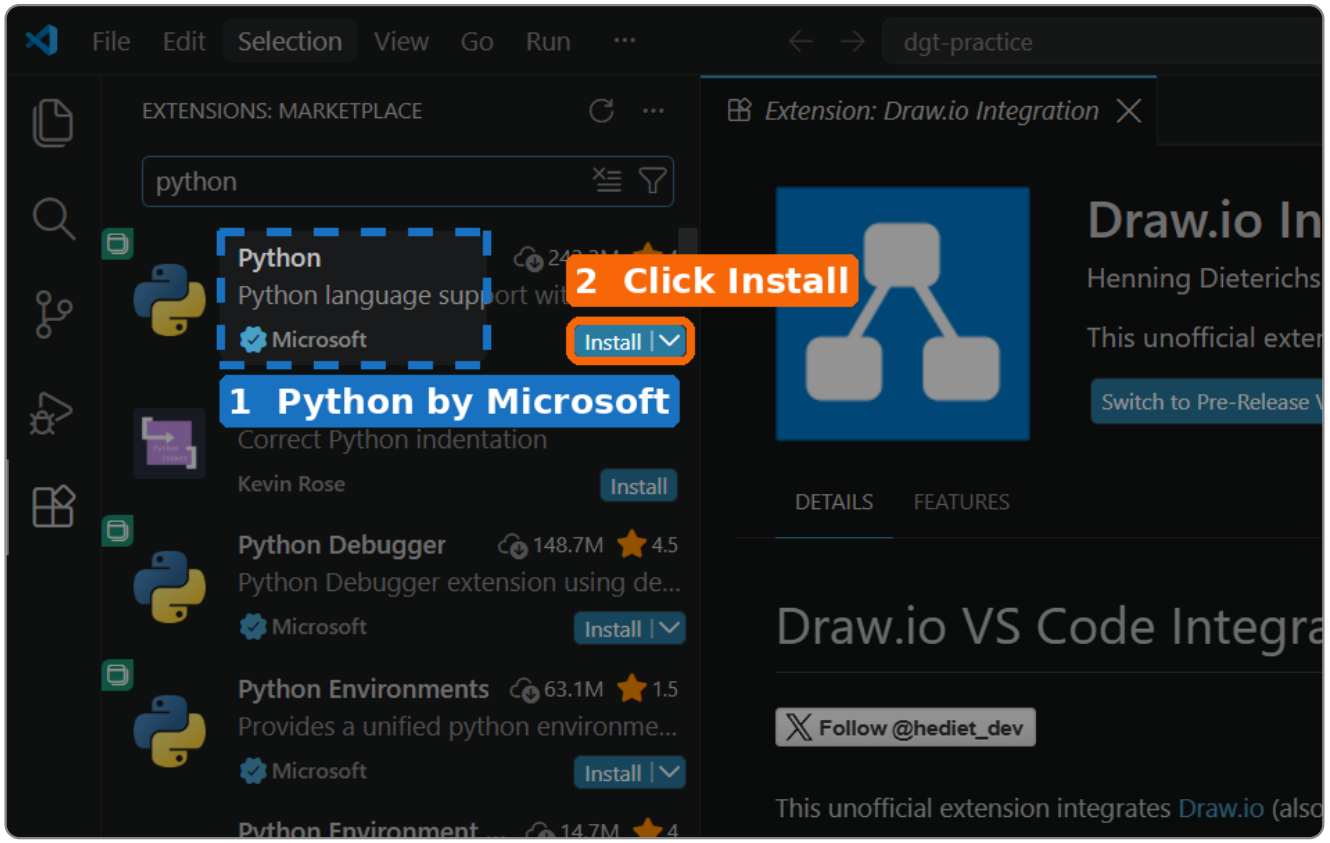

VS Code › Extensions

Select the text in the search box.

Type `python`.

Click **Install** beside **Python** by **Microsoft**.

Skip this if your kaiako says you don't need Python yet.

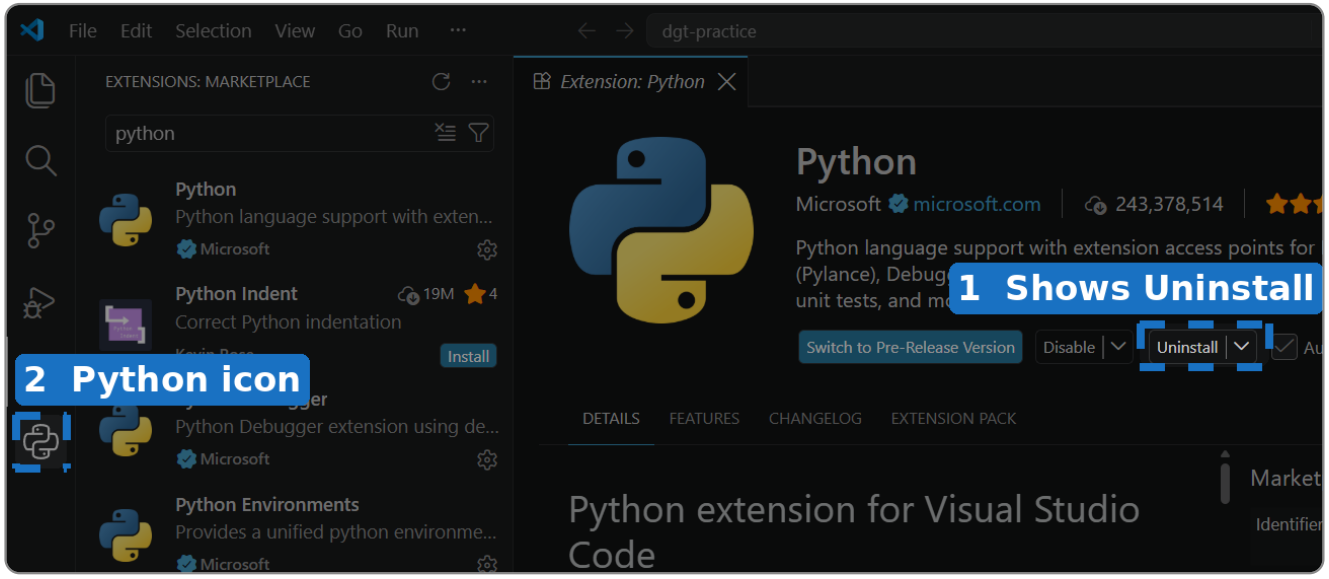

9

VS Code › Extension: Python

Wait while it installs.

VS Code also installs **Python Debugger** and **Python Environments**. That's normal.

> **Check: Uninstall** appears, and a Python icon appears in the left bar.

Go Live

Live Server adds **Go Live** to the bar at the bottom of VS Code. Click it to preview your web page in Chrome.

Installed once

Extensions stay installed on that computer. On a new computer, install them again.

Checkpoint

- [ ] I installed Live Server, and I can see Go Live at the bottom of VS Code.
- [ ] I installed Draw.io Integration.
- [ ] I installed Python (if my kaiako asked).
