Sign in and save your MakeCode game

Digital Technologies · School and personal computers

You will

- sign in to MakeCode Arcade with your school Google account
- make a new game that saves to the cloud
- open your game on any computer

You need

- your school Google account

Before you start

- Without signing in, your game is saved only in that browser on that computer, and it can disappear. Signed in, it follows you to any computer.
- Back up your game as a file too (see the guide Back up and share your MakeCode game).

 Click here  Look here

1

Chrome › arcade.makecode.com

Go to `arcade.makecode.com`.

Click **Sign In** (top right).

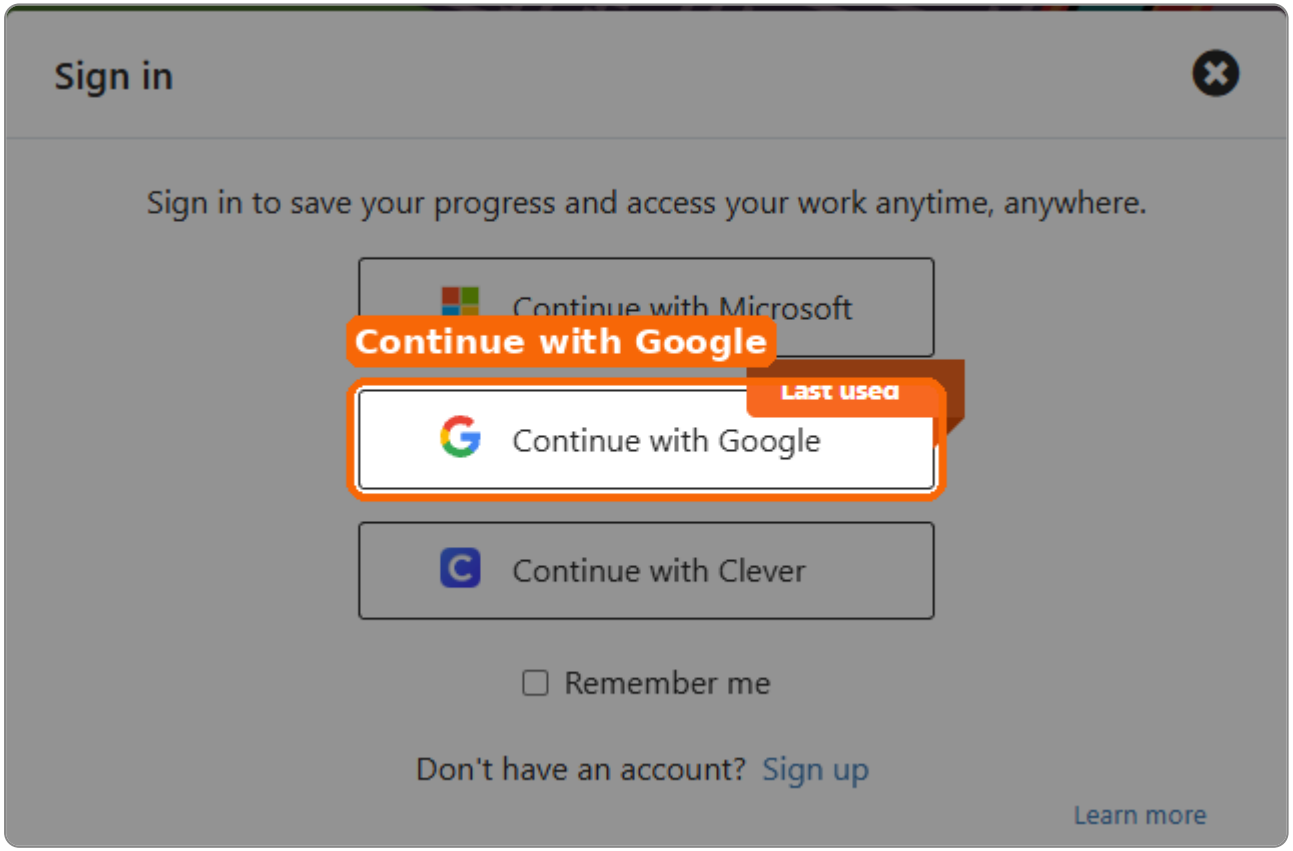

2

MakeCode › Sign in

Click **Continue with Google**.

Tick **Remember me** only on your own computer.

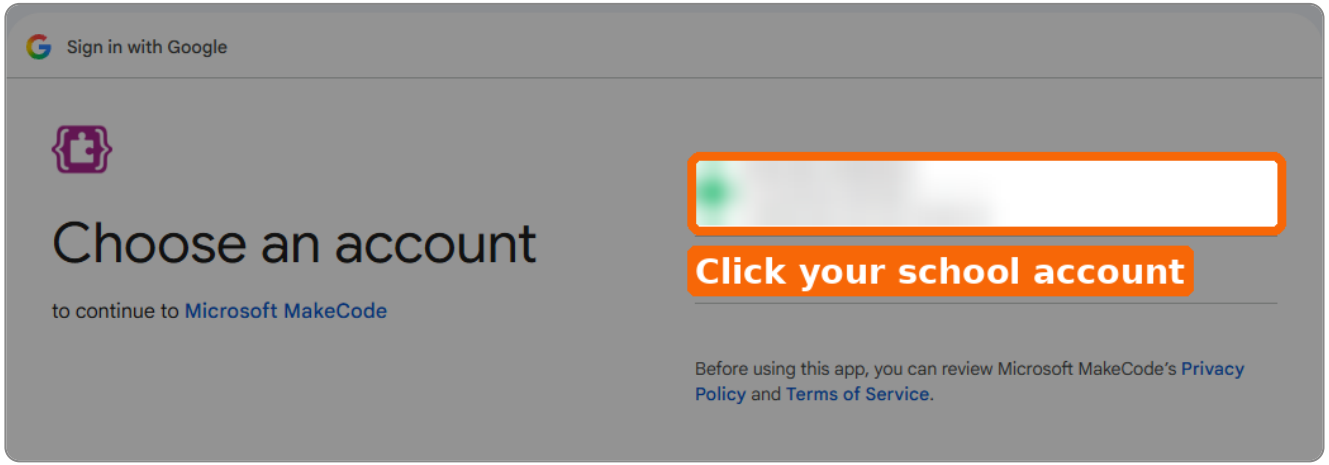

3

Google › Choose an account

Click your school account.

Your school account isn't listed? Click Use another account and type your school email.

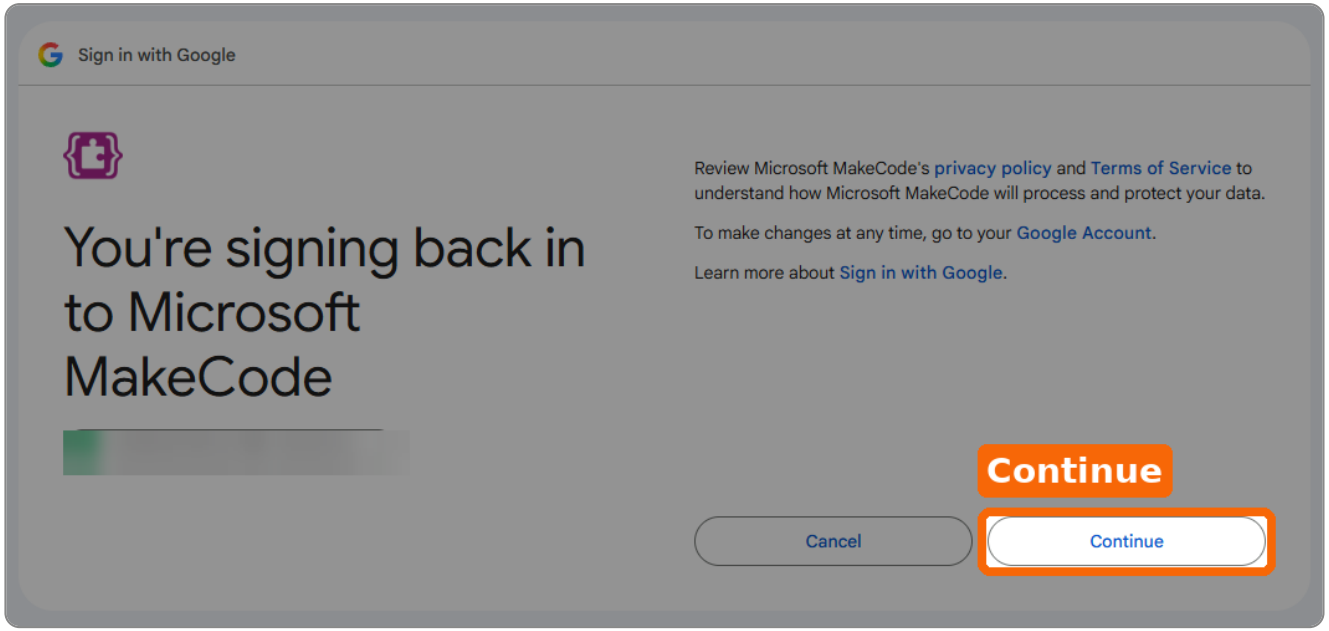

4

Google › Sign in to Microsoft MakeCode

Click **Continue**.

The first time, Google may ask you to allow MakeCode. Click Continue or Allow.

5

MakeCode › Home

Check your initials are in the top right.

Click **New Project**.

Your saved games appear under **My Projects**.

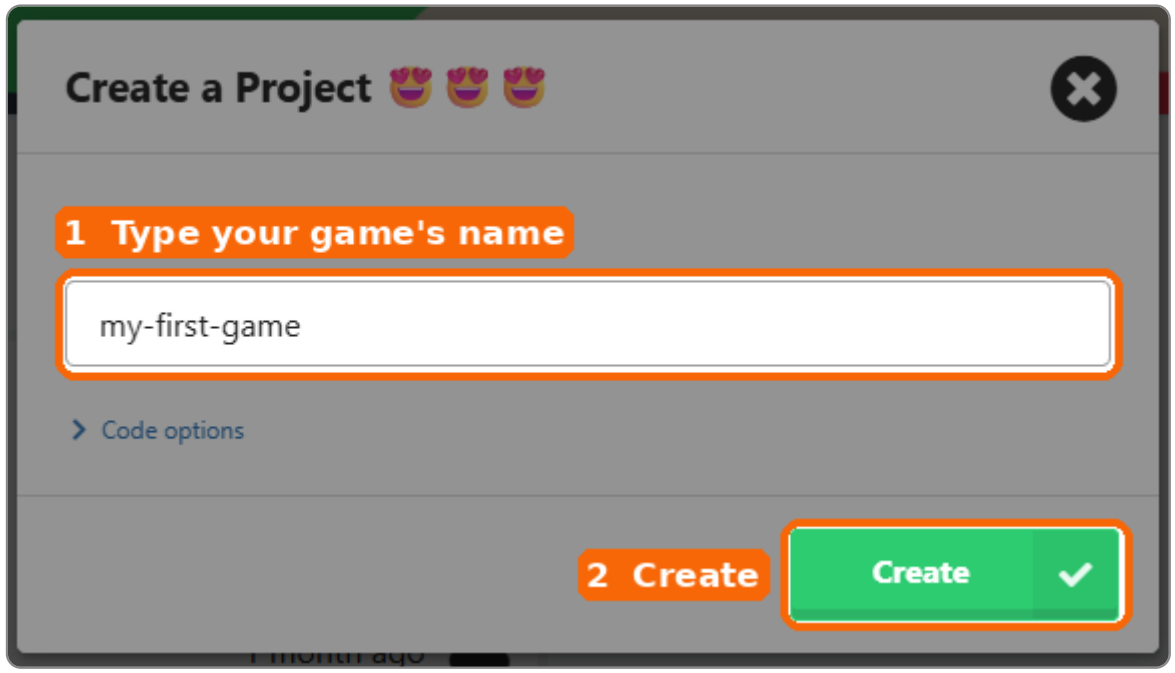

6

MakeCode › Create a Project

Type a name for your game, like `my-first-game`.

Click **Create**.

Lowercase with dashes keeps names tidy.

7

MakeCode › Editor

Look at the bottom, next to your game's name.

MakeCode saves to the cloud each time you make a change.

Check: a cloud and saved!, so your game is saved to your account.

If something goes wrong
No cloud or saved! next to the name: you aren't signed in. Click **Sign In** (top right) and sign in.

On any computer

Go to `arcade.makecode.com`, sign in with your school account, and click your game under **My Projects**.

Start of each lesson

Check your initials are in the top right before you start working.

Checkpoint

- [ ] I can sign in to MakeCode Arcade with my school account.
- [ ] My game saves to the cloud.
- [ ] I can open my game on another computer.
